D.   BUSINESS CASE/REASON FOR CHANGE:

The proposed change will in the spirit of the Administrative Simplification provisions of HIPAA provide a vehicle to collect Mother's Medical Record Number on a newborn claim submission consistent with the reporting of other clinical and billing data using ANSI ASC X12 standards.

Hospital discharge records have become a major source for both program and research activities in the area of maternal and child health. The Mother's Medical Record Number collected for each inpatient newborn discharge facilitates linkage between the mother's and baby's hospital records. The health of a baby's mother is a documented risk factor in determining current and future treatment needs for newborns.   This element is required by the following state discharge data systems: New York and New Jersey. The data is used to facilitate research and augment the treatment decision making process for newborn patients.

Providing a reliable linkage variable reduces the human and fiscal resources necessary to enable appropriate short and long-term decisions related to the care and treatment of newborns in this country.

According to Medicaid rules, if a mother receives Medicaid coverage, her newborn child would also qualify for Medicaid benefits. The collection of the Mother's Medical Record number would facilitate the linking of Medicaid eligible mothers to their newborn's records for enrolling these qualified recipients. Current New York State law requires babies born from Medicaid eligible mothers to be issued a Medicaid insurance card within 15 days of birth. The mother's medical record number facilitates the necessary linkage of the newborn and mother's birth records. The assignment of a mother's medical record number code in the X12 standard anticipates multiple uses of this data element.

E. PROPOSED WORK:

Add a new code to simple data element 128, Reference Identification Qualifier. Add the extended definition.

MRN   Mother's Medical Record Identification Number
A unique number assigned to the mother of the patient by the provider of service (hospital) to assist in retrieval of medical records

FORM FOR NEW OR REVISED EXTERNAL CODE SOURCE REFERENCE

FOR X12.3 DATA ELEMENT DICTIONARY

INSTRUCTIONS: Complete this form only when a new data element or data element code reference is requested to be added to Appendix A of *X12.3 Data Element Dictionary* which references a code list published by an organization external to X12. Use one form for each new or revised reference. This form may be used to revise current references; fill out the appropriate areas below.

PART 1: REFERENCE Circle 1 or 2 below. If 2, fill in the blank.

(1) NEW REFERENCE
(2) REVISED REFERENCE, Current reference number/name _____

PART 2: REFERENCE TITLE If there is only one source for codes for the data element, the title should be the same as the data element name. If there are multiple codes referencing external code sources for the same data element, title should approximate the code definition.

REFERENCE TITLE:

PART 3: DATA ELEMENTS USED IN Give the data element reference number and name which directs the user to this code source. Give the code ID (if assigned) if this is for a specific code of the data element.

USED IN: DE No. _____, Code ID _____

PART 4: SOURCE Provide the name of the publication which contains the codes referenced.

PUBLISHED IN:

PART 5: AVAILABLE FROM Give the publisher, or other contact, from whom the user can obtain the document.

AVAILABLE: Name/Attn of   _____

Company   _____
